CSE 11 Programming Assignment 1

Name (Last, First):   *Rivett, Max*
PID: *A16885138*
Email: *mrivett@ucsd.edu*

Setup:

I am using Java 16.0.2, which I downloaded by following the instructions highlighted in *Part 1* of the *CSE 11 Programming Assignment 1* webpage. This involved using the JDK installer and checking my Java version in the command line.

```
MacBook-Pro-5:cse11-pa1-starter-main max.rivett$ java --version
openjdk 16.0.2 2021-07-20
OpenJDK Runtime Environment Temurin-16.0.2+7 (build 16.0.2+7)
OpenJDK 64-Bit Server VM Temurin-16.0.2+7 (build 16.0.2+7, mixed mode, sharing)
```

I am using Visual Studio Code (VSC) as my code editor mainly due to the ability to run the program from a built-in terminal window, but also due to the overall sleekness of the application. I downloaded VSC several years ago, likely from their webpage at https://code.visualstudio.com/.

Running Code:

```
MacBook-Pro-5:cse11-pa1-starter-main max.rivett$ ./run DesignRecipeExamples
Tester Library v.3.0
-------------------------------------
Tests defined in the class: DesignRecipeExamples:
-------------------------------
DesignRecipeExamples:
----------------
new DesignRecipeExamples:1(
 this.p1 = 18
 this.p2 = 36
 this.ba1 = 30
 this.ba2 = 29
 this.ba3 = -1
 this.dts1 = 60
 this.dts2 = 144
 this.macc1 = 193
 this.macc2 = 4106)
----------------
No test methods found.
```
